

iShares SPI Equity Index Fund (CH) Class I CHF

MARCH 2021 FACTSHEET

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Assets information as at: 31-Mar-2021. All other data as at 19-Apr-2021.

This document is marketing material. For Investors in Switzerland. Investors should read the Key Investor Information Document and Prospectus prior to investing.

FUND OVERVIEW

The investment objective of the sub-fund consists of replicating the performance of the Swiss Performance Index (SPI®) (the "reference index") by using the replicating strategy (full replication) and in the approximate weightings of the reference index. It may be the case here that the sub-fund does not invest in all securities of the reference index, but uses a representative selection of the reference index (Optimized Sampling).

12 MONTH PERFORMANCE PERIODS

Share Class performance is calculated on a Net Asset Value (NAV) basis, with income reinvested, in Swiss Franc, net of fees. Performance information has been calculated net of all charges applicable to the share class. Actual performance for a particular client account will depend upon the fee structure applicable to the account and any restrictions imposed on the account. Benchmark performance displayed in CHF. SUSTAINABILITY CHARACTERISTICS

Sustainability Characteristics can help investors integrate non-financial, sustainability considerations into their investment process. These metrics enable investors to evaluate funds based on their environmental, social, and governance (ESG) risks and opportunities. This analysis can provide insight into the effective management and long-term financial prospects of a fund.

The metrics below have been provided for transparency and informational purposes only. The existence of an ESG rating is not indicative of how or whether ESG factors will be integrated into a fund. The metrics are based on MSCI ESG Fund Ratings and, unless otherwise stated in fund documentation and included within a fund's investment objective, do not change a fund's investment objective or constrain the fund's investable universe, and there is no indication that an ESG or Impact focused investment strategy or exclusionary screens will be adopted by a fund. For more information regarding a fund's investment strategy, please see the fund's prospectus.

MSCI ESG Fund Rating (AAA-CCC)	AA	MSCI ESG Quality Score (0-10)	7.24
MSCI ESG Quality Score - Peer Percentile	43.18%	MSCI ESG % Coverage	98.77%
Fund Lipper Global Classification	Equity Switzerland	MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES)	116.00
Funds in Peer Group	176		

All data is from MSCI ESG Fund Ratings as of **07-Apr-2021**, based on holdings as of **28-Feb-2021**. As such, the fund's sustainable characteristics may differ from MSCI ESG Fund Ratings from time to time.

To be included in MSCI ESG Fund Ratings, 65% of the fund's gross weight must come from securities covered by MSCI ESG Research (certain cash positions and other asset types deemed not relevant for ESG analysis by MSCI are removed prior to calculating a fund's gross weight; the absolute values of short positions are included but treated as uncovered), the fund's holdings date must be less than one year old, and the fund must have at least ten securities. For newly launched funds, sustainability characteristics are typically available 6 months after launch.

ESG GLOSSARY:

MSCI ESG Fund Rating (AAA-CCC): The MSCI ESG Rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

MSCI ESG Quality Score - Peer Percentile: The fund's ESG Percentile compared to its Lipper peer group.

Fund Lipper Global Classification: The fund peer group as defined by the Lipper Global Classification.

Funds in Peer Group: The number of funds from the relevant Lipper Global Classification peer group that are also in ESG coverage.

MSCI ESG Quality Score (0-10): The MSCI ESG Quality Score (0 - 10) for funds is calculated using the weighted average of the ESG scores of fund holdings. The Score also considers ESG Rating trend of holdings and the fund exposure to holdings in the laggard category. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.

MSCI ESG % Coverage: Percentage of a fund's holdings that have MSCI ESG ratings data.

MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES): Measures a fund's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per \$1 million in sales across the fund's holdings. This allows for comparisons between funds of different sizes.
